

MEER MOHAMMAD FAISAL

📞 8409335800 📍 Bangalore, Karnataka ✉️ faisal@gmail.com [🌐 LinkedIn](#) [🐙 GitHub](#)

Career Summary

Computer Science (AIML) undergraduate and **Software Engineer Intern at Dehix**, with hands-on experience in **backend and full-stack development** and **AI-powered applications**. Proficient in **C++, Python, and JavaScript**, with practical exposure to **machine learning and Generative AI**, including **LLMs, vector DB, and RAG-based systems**.

Education

Technocrats Institute of Technology

Bachelor of Technology in Computer Science - AIML (CGPA-8.79)

Sep 2022 - May 2026

Bhopal, Madhya Pradesh

Relevant Coursework

- | | | | |
|---------------------------|--------------------|---------------------|------------------------|
| • Data Structures | • Machine Learning | • DBMS | • Computer Networks |
| • Artificial Intelligence | • Web Development | • Cloud Computing | • Software Engineering |
| • Algorithm Analysis | • OOP | • Operating Systems | • System Design basics |

Experience

Dehix **Nov 2025 - Jan 2026**

Software Engineer Intern

- Developed and maintained backend services using Node.js and Express.js, improving API response time by **30%** through modular architecture and optimized request handling.
- Implemented secure authentication and authorization workflows with token validation and role-based access control, securing **100% of protected endpoints**.
- Designed and optimized MongoDB schemas and queries, reducing data retrieval latency by **25%** while supporting scalable, high-performance backend operations.

Projects

FaisCode - AI Coding Platform | *React, Node.js, MongoDB, GenAI, OpenAI API*

Sep 2025

- Engineered an end-to-end AI coding assistant that generates problem explanations, solution approaches, starter templates, and test cases, improving problem-solving efficiency by **40%**.
- Built an intelligent code generation pipeline with hidden test cases and reference solutions, enabling iterative learning and reducing manual coding effort by **35%**.
- Implemented secure authentication and authorization using JWT with role-based access control, protecting **100%** of AI-powered APIs and enabling safe user interaction with the platform.

Heart Attack Prediction | *Python, Machine Learning, Scikit-Learn, Model Evaluation*

June 2025

- Developed a machine learning model to predict heart attack risk using clinical inputs such as age, cholesterol, blood pressure, heart rate, chest pain type, and ECG indicators.
- Trained and compared multiple ML models (Logistic Regression, SVM, Random Forest, KNN), achieving an accuracy of around **85%** using ROC-AUC and cross-validation.
- Built an interpretable prediction pipeline with feature-importance analysis and a lightweight UI/API for real-time risk assessment.

FaisGPT - AI Conversational Assistant | *Python, Node.js, LLM, React*

Jan 2025

- Developed a custom AI conversational assistant using LLMs and OpenAI APIs, enabling natural language understanding, contextual responses, and multi-turn conversation handling similar to ChatGPT capabilities.
- Developed a scalable backend with secure API handling and modular architecture, supporting future extensions like personalization and authentication.

Technical Skills

Languages: C, C++, JavaScript, Python, HTML/CSS, SQL.

Technologies/Frameworks: React.js, Node.js, Express.js, NumPy, Pandas, Scikit-Learn, Machine Learning, Generative AI, LLMs, Vector Databases, RAG, MongoDB, Redis, PostgreSQL.

Developer Tools: VS Code, Git/GitHub, Postman, REST APIs, Jupyter Notebook, Windsurf.

Certification / Achievement

- Oracle Cloud Infrastructure (OCI) Generative AI Professional
- Machine Learning and AI Projects - Completed multiple applied ML projects including House Price Prediction, Heart Attack Prediction, AI-powered LeetCode Assistant, and FaisGPT Conversational AI.
- Solved 400+ problems on Leetcode and GFG.
