

MEER MOHAMMAD FAISAL

Software Engineer — Full Stack Development

fmd35585@gmail.com | 8409335800 | Hyderabad, Telangana | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#) | [GFG](#)

Summary

Full Stack Engineer (B.Tech in Computer Science) with production experience building **REST APIs** in **Node.js/Express**, **React** front ends, and **MongoDB/PostgreSQL** data layers. Comfortable across the stack: authentication and authorization (**JWT, RBAC**), schema design and query optimization, and cloud deployment (**AWS EC2, Docker, GitHub Actions CI/CD**). Also builds **LLM-integrated applications** (**OpenAI/Groq APIs, RAG pipelines**) as an applied specialization on top of core software engineering. Solved **450+ DSA problems**. Seeking Software Engineer / Full Stack / Backend roles.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, SQL.

Backend: Node.js, Express.js, REST API Design, JWT Auth, RBAC, Middleware, Microservices, Distributed Systems, Rate Limiting, Error Handling.

Frontend: React.js, Next.js, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3, React Hooks, Component Architecture.

Databases: MongoDB, PostgreSQL, Redis (Schema Design, Query Optimization, Indexing, Caching Strategies).

Cloud & DevOps: AWS (EC2), Docker, Containerization, CI/CD Pipelines, Load Balancing, Git, Postman, Vercel.

Testing & Performance: Jest (unit & integration testing), BullMQ, Performance Optimization, Scalability.

CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, DBMS, OS, Computer Networks.

AI/GenAI (applied): OpenAI API, Groq API, RAG Pipelines, Vector Databases, LLM Integration, LangChain.

Experience

Dehix Nov 2025 – Jan 2026

Software Engineer Intern

- Built **15+ production REST APIs** in **Node.js/Express** with modular middleware chains, reducing average API latency by **approximately 30% (420ms to 290ms)**; Enhanced centralized **error handling, request validation**, and **structured logging** across 3 service modules.
- Designed a multi-role authentication system using **JWT** access/refresh token rotation and **RBAC**, securing **100%** of protected endpoints across Admin, Freelancer, and Client roles; implemented **Redis caching** and **BullMQ** job processing, reducing database queries by **35%**.
- Re-engineered **8 MongoDB collection schemas** with **compound indexing** and projection-based queries, eliminating full-collection scans and cutting read latency by **25%**; containerized services with **Docker** and automated deployments using **GitHub Actions CI/CD** on **AWS EC2**.

Projects

RoleMatch AI - Resume/JD Analyzer | *React, Node.js, MongoDB, Groq API* | Live | Code Feb 2026

- Implemented **multi-layer backend** for **resume parsing, JD analysis**, and **LLM orchestration** with **JSON schema enforcement, structured output parsing**, and **RAG pipelines**, generating **300+ ATS-optimized resumes**.
- Developed a **React dashboard** for skill-gap analysis and interview preparation; containerized with **Docker** and deployed via **GitHub Actions CI/CD**, supporting **150+ users** with **85% session retention**.

FaisCode - AI Coding Platform | *React, Node.js, Redis, MongoDB, OpenAI API* Sep 2025

- Created a responsive **React** application with reusable components and stateful AI chat workflows, integrating **OpenAI APIs** for iterative, category-aware code generation; served **200+ users** who generated **1,200+ code solutions**.
- Secured the backend with **Node.js, MongoDB**, and **Redis**, implementing **JWT authentication**, a Redis-backed refresh-token store, optimized database indexing, per-user API rate limiting that reduced OpenAI API costs by **35%**, and Redis caching for faster responses, sustaining **75% 30-day user retention**.

ShortLink - URL Management Platform | *React.js, Node.js, Redis, BullMQ, Supabase* Jan 2025 – Jul 2026

- Built a full-stack **URL shortener** using **React.js, Node.js/Express, Supabase (PostgreSQL)**, and **Tailwind CSS**, supporting **200+ shortened URLs** with authentication, QR code generation, and real-time analytics dashboard.
- Engineered the backend with **Redis caching, fixed-window rate limiting**, and **BullMQ**-based asynchronous click analytics; achieved **89% Jest test coverage** across unit and integration tests, including rate-limiter.

Education

Technocrats Institute of Technology

Bachelor of Technology in Computer Science - AIML (CGPA: 8.48)

Sep 2022 – May 2026

Bhopal, Madhya Pradesh

Certifications

- Oracle Cloud Infrastructure (OCI) – Generative AI Professional | Credential
- Oracle Cloud Infrastructure (OCI) – AI Foundation Associate | Credential
